Experience

1. Bank Indonesia - PT Adidata Informatika

UI/UX Designer (Nov 2025 – now).

As UI/UX Designer, I have responsibility to develop a design system for existing projects and rework its mockups with updated components.

Project:

- **Digital Workspace (DWP) Design System.** Built on **Figma**.
Develop a complete design system for Digital Workplace (web and mobile) with more than 20+ components and its variants. This design system is intended to improve development workflow and design consistency.
- **Digital Workspace (DWP) Mockups Development and Refinement.** Built on **Figma**.
Involved in ongoing sprint development to provide mockups based on agreed backlogs. Revamp existing mockups with updated components. Create a master mockups file as a master file to be referred by developers, system analysts, and technical writers.

2. Moonlay Technologies

UI/UX Designer (Sep 2021 – Aug 2025).

As UI/UX Designer, I conduct user and market research, build design systems, prototypes, and mockups for Moonlay's projects which are related to financial and banking services. Beside that, I am also learning about AI-based website development tools and front-end development basics to elevate my skills.

Project:

- **ST Engineering e-CSR Project.** Built on **Figma and v0**.
Digitalize manual system for capability study report of aircraft's maintenance. There are 19 forms and complicated existing workflows that we need to understand and solve. We create design systems, mockups, and front-end code using AI tools for faster development.
- **IDX – CTP MOFIDS PD's and ADMIN Redesign.** Built on **Figma**.
Revamp existing trading system UI/UX on Centralized Trading Platform (CTP) to manage stocks and securities auction in IDX and Indonesian Government. Developed UI/UX mockups, prototypes, and design system for more than 10 userflows and strict data handling in 2 months timeline development.
- **Visee.ai (Prototype and Brand Guideline).** Built on **Figma**.
Develop dashboard and landing page for customer analytic platform with AI powered camera. We're visualizing key data in charts and numbers which are related to the user's needs.
- **Moonlay Technologies Website.** Built on **Webflow** and **WordPress**.
Redesign Moonlay Technologies' company website to adapt with user and market needs by re-aligning the company's business and services. Increase conversion rate to 60%.
- **Moonlay Design System.** Built on **Figma**.
A design system (components) crafted specially to Moonlay Technologies' project and internal product. This system improves development process and speed by 50%.

3. Narabahasa

Digital Marketing Internship (Jan – Mar 2021).

During the internship, I was responsible, alongside the social media admin intern under the digital team, for:

- Working with the social media admin to portray the virtual character "Nara" to interact with the online community across 4 social media platforms (Instagram, Twitter, Facebook, and LinkedIn)
- Developing advertising strategies for Narabahasa's content, increasing engagement by around 10% during the internship period through Facebook and Instagram Ads.
- Reporting content and ad performance to the entire team at the start of every week.
- Writing articles/stories/literary pieces as part of writing practice exercises.

4. Astra Property

UI/UX Designer Internship (May – Aug 2020).

This was a Kerja Praktek (KP) work placement program from ITB's Informatics program, with the role of UI/UX Designer, responsible for:

- Redesigning the Asya and Astra Property Sales App. Starting from the problem of users struggling to visualize the interior layout of a house, the new app was designed to accommodate a virtual tour feature and a fresher design language inspired by Airbnb.
- Successfully convinced the team to migrate UI/UX tools from InVision to Figma, improving real-time collaboration capabilities and file organization.

5. Freelance

UI/UX Designer and Web Development (2021 – 2025)

Project:

- [**IGV Engineering**](#). Built on **Squarespace**.
A newly developed startup focusing on food-waste management. Company profile website developed in Squarespace in 1 week.
- **Lark Visualization**. Built on **WordPress**.
A revamp website developed to show Lark Visualization's portfolio about architecture and building design, created in 1 month duration.
- [**Buletin Pillar**](#). Built on **Figma**.
A website that provides various articles and devotions about Christianity, Reformed movement, and church. This improvement increased the website's traffic to more than 80% (comparison. 2022-2024)
- **The Gamelan in Hong Kong**. Built on **WordPress**.
A website developed to inform visitors about Gamelan concert in Hong Kong conducted by Lauryn Vania K, developed in 1 month duration.

6. Wardaya College

Teacher for CS100: Introduction to Computer Science Class (2021).

Taught Python programming class in CS100 curriculum, from basic syntax to *object-oriented programming* (OOP).

Certification

1. [**Mobile UI Design**](#). Top 10% Distinction. *Obtained on May 27, 2026.*
2. [**Object-Oriented Design: Build Interfaces Users Love on Interaction Design Foundation \(IXDF\)**](#). Top 10% Distinction. *Obtained on December 29, 2025.*
3. [**AI for Designers on Interaction Design Foundation \(IXDF\)**](#). Top 10% Distinction. *Obtained on November 17, 2025.*
4. [**Google UX Design Professional Certificate on Coursera**](#). *Obtained on October 12, 2023.*
5. [**EF SET English Certificate 75/100 \(C2 Proficient\)**](#). *Obtained on October 21, 2023.*
6. **Speaker Certificate - Peran UI/UX Designer: Membangun Industri Digital di Era Perkembangan Teknologi**. *Obtained on July 31, 2022.*
7. **Speaker Certificate - UI/UX Design: An Interactive Introduction to Figma**. *Obtained on November 26, 2021.*

Education

1. **Institut Teknologi Bandung (ITB)** August 2017 – July 2021.
Bachelor of Engineering (S.T.) in Informatics. GPA 3.26 out of 4.

Skill

1. **Software**
Figma (Design and Make), v0.dev, Webflow, Framer.ai, WordPress, Jira, ClickUp, Miro, Draw.io, Adobe Illustrator, Adobe Photoshop, Adobe Premiere Pro, Microsoft Office
2. **Programming**
Python, HTML/CSS, JavaScript, React
3. **Language**
English, Indonesian
4. **Framework**
Agile, Waterfall
